Mr. Femi Akindele Residual Project Manager Kentucky/Tennessee Section U.S. Environmental Protection Agency Region IV 61 Forsyth Street Atlanta, GA 30303

Re: Report of Field Observation – FY03 - Second Quarter (FY03-2Q) Lees Lane Superfund Site, Jefferson County, Kentucky, Administrative Order on Consent, USEPA Docket No-91-32-C

Dear Mr. Akindele

In accordance with paragraph 11, under <u>Reporting Requirements</u>, of the subject Consent Order and Attachment 1, Operation and Maintenance Plan For Post-Removal Site Control at the <u>Lees Lane Landfill Site</u>. I am enclosing one (1) copy of the <u>Report of Field Observation</u> (Appendix J), identified as Observation Report No FY03-2Q, for your information and files.

Please advise if you have any questions concerning the attached Report of Field Observation for FY03-2007

Sincerely.

Richard H. Watkins, Sr.

Special Assistant to Director of Maintenance

RHW/rw Lees-03-20

# REPORT OF FIELD OBSERVATION LEE'S LANE LANDFILL SITE, LOUISVILLE, KENTUCKY

Observation Report No.: FY03-2Q Date of Observation: 12/17/02

Instruction:

If any item is checked yes, provide details of the problem and maintenance

recommendations below and indicate the location of deficiency on the site map

provided.

Comment No.:	Comment
A-4	Small amount of rutting was observed on the gravel road leading to gas collection Well No. 5 from ATVs.
B-1	Condition of the Lee's Lane barricade remains unchanged from previous quarterly institutional inspections.
B-2	Condition of the Putnam Avenue barricade remains unchanged from previous quarterly institutional inspections. Intrusions into the landfill site and flood protection levee areas by ATVs from the woods adjacent to the Putnam Avenue barricade has been reduced, but is still evident. The landfill site and flood protection levee continues to receive surveillance by the Jefferson County Police.

# A-4 Schedule gravelling of the access road leading to Well No. 5 to fill rutted areas during FY03-3Q as weather and scheduling permit. B-1 Continue to observe condition of the Lee's Lane barricade during future quarterly institutional inspections. Schedule painting of Lee's Lane barricade during FY03-3Q.

B-2 Continue to observe condition of the Putnam Avenue barricade during future quarterly institutional inspections. Replace damaged "No Trespass – Keep Out" signs at strategic locations along the access roads and Mill Creek cut-off channel areas in an effort to discourage ATV intrusions and trespass into the landfill and levee area sites. Schedule painting of Putnam barricade by end of FY03-3Q.

### Comment No.:

### **Comment**

C-7	Observed tilted well and moisture trap concrete collars for 2, 4, 8, 11, 12, 14, and 16
C-8	Observed covers missing for moisture traps 25, 26, and 27.
D-3	Observed protective casing of gas monitoring wells rusting.
D-6	Observed some vegetation growth around two of the gas monitoring well enclosures.

## Comment No.

### **Corrective Action Performed**

C-7	Schedule resetting of tilted well and moisture trap concrete collars for moisture traps 2, 4, 8, 11, 12, 14 and 16 weather and scheduling permitting.
C-8	Replacement covers obtained and install on moisture traps
D-3	Schedule painting of gas monitoring wells protective casings during FY03-3Q.
D-6	Vegetation growth around two of the gas monitoring well enclosures trimmed and removed prior to of FY03-2Q.

Comment No.:	Comment
D-8	Monitoring wells tubing, fittings, and valves were not directly observed but no external damage or disturbance to enclosures was evident.
E-7	Observed vegetative growth on portions of the riprap levee and riprap drainage channel slopes.
E-8	Observed small amount of trash and debris build-up on the riprap area from prior observations. Trespassers continue to utilize the debris as fuel for small bonfires, thereby eliminating the necessity to remove the debris from the riprap area.
F-4	Observed areas of inadequate grass cover from intrusion of ATVs.
F-5	There was no evidence of ponding water, although there are several ruts left by ATVs.

Comment No.	Corrective Action Performed
D-8	Monitoring well tubing, fittings, and valves were not directly observed but no external damage or disturbance to enclosures was evident.
E-7	Spraying of the riprap drainage channels and riprap cap area should be scheduled during FY03-3Q.
E-8	No further action required at this time.
F-4	Monitored at future quarterly institutional inspections backfill and seed areas as necessary.
F-5	No further action required at this time. Condition of ruts left by ATVs and other vehicles should be monitored at future quarterly institutional inspections and backfilled as necessary.
